DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: claim 1 has been allowed over the prior art because they fail to teach an optical semiconductor device comprising; an active region; a p-doped cladding region disposed on one side of the active region; **wherein an electron-reflecting barrier is provided between the cladding region and the active region for reflecting both Γ -electrons and X-electrons, and the electron-reflecting barrier providing a greater potential barrier to Γ -electrons than the p-doped cladding region wherein the electron reflecting barrier comprises a first electron-reflecting layer for reflecting Γ -electrons and second electron reflecting layer for reflecting X –electrons.**

Claims 3 - 19 has been found allowable due to their dependency on claim 1.

The following is an examiner's statement of reasons for allowance: claim 20 has been allowed over the prior art because they fail to teach an optical semiconductor device comprising; an optical guiding region; an active region having at least one energy well, said active region being disposed in said optical guiding region; and n-

doped and p-doped cladding regions disposed on opposite sides of the optical guiding region; **wherein an electron-reflecting layer Γ -electrons is provided between the p-doped cladding region and the active region and wherein the electron-reflecting layer contacts with the optical guiding region so that the Γ -conduction band of the optical guiding is substantially degenerate with the X-conduction band of the electron-reflecting layer and the electron-reflecting layer is formed of AIP**

Claims 21 – 24 has been found allowable due to their dependency on claim 20.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reason for Allowance".
